Exos is about training you

Your training, nutrition, and physical therapy is personalized.

The results of your initial performance screenings influence how our team handcrafts your training sessions and nutrition plan to maximize performance at the combine and build overall strength, power, and movement ability.

Your progress is tracked.

Our coaches, physical therapists, nutritionists, mindset specialists, massage therapists, and position coaches are in constant communication to ensure your plan is driving your success.

Your training is cutting edge.

Exos' training system is guided by our four pillars of mindset, nutrition, movement, and recovery. Our methods continually evolve based on the most innovative and cutting-edge training techniques.

"Everyone gets the individual, personal attention they need."

Denzel Ward | CB | Cleveland Browns | 2018 No. 4 pick

"It's very individualized to a point where the coaches, took everybody and tested them and then see what you need because everybody's different. So they'll put that into your plan, and everybody has a different plan. So it's really nice knowing that they're looking out for each one of you, not just as a whole group."

**The NFL Combine is
more than physical.
Your training
should be, too.**

“All the interview prep, the Wonderlic things, everything that they do here to help you in every aspect of the combine, I think is really key.”

Trey McBride | TE | Arizona Cardinals | 2022 Round 2 Pick 23

Wonderlic test prep

Improve your score by working with sports psychologists who provide insight into the test and test-taking strategies. Ensure you're prepared with practice tests taken throughout training.

Interview training

Work with a former NFL general manager and other media experts to prepare for team and media interviews at the postseason All-Star Games and combine.

Social media training

Everyone is watching. NFL teams keep on eye on your social accounts. Learn how to build your personal brand and work with a social media expert to avoid pitfalls that could hurt your draft stock.

Speed training

Develop proper technique. Maximize linear and multidirectional speed. Find that extra gear.
